- Santa Ana winds.

3. - San Diego

- Los Angeles

- Las Vegas

- Roma

- Pacific Palisades

- Beverly Hills

- Washington Dc

- California

- Bel Air

- Brentwood

4. Rising temperatures over time are changing weather patterns and upsetting the usual balance of nature. This poses many risks to humans and all other life forms on earth.

do es aquel que reemplaza el significado literal de las natu

Global climate change already has observable effects on the environment. Glaciers have shrunk, ice on rivers and lakes is melting prematurely, habitats of plants and animals have changed, and trees bloom earlier. The effects that scientists predicted in the past to emerge from global climate change are happening now: loss of sea ice, accelerating sea level rise, and more intense heat waves.

5. Scott Franklin is a central fire consultant in LA.

6. It is a unique city in the US one of the main characteristics is from the other large American metropolises.
