

1)

$$0,000101 = 1,01 \times 10^{-6}$$

2)

$$\begin{array}{l} 10^{-7} \rightarrow 1000 \text{ ml} \\ 1051 \rightarrow X \end{array}$$

$$X = \frac{1051 \cdot 1000 \text{ ml}}{0,00001} = 1,05 \times 10^{11}$$

3)

$$15.000.000,0 = 1,5 \times 10^8 \text{ Km}$$

5)

$3 \times 10^8 \text{ m}$ setara palar a Km

$$3 \times 10^5 \text{ Km} \cdot 3 \times 10^7 = 3 \times 10^{12}$$
