

Our father

Our father, who art in heaven,
hallowed be thy name, thy kingdom
come, thy will be done, on earth as
it is in heaven.

Give us this day our daily bread
and forgive us our trespasses, as
we forgive those who trespass
against us and lead us not into
temptation, but deliver us from evil

Amen.

Hail Mary.

Hail Mary
full of grace
the lord is with thee
Blessed art thou among women.
and blessed is the fruit
of thy womb, Jesus.
Holy Mary
mother of god
pray for us sinners now
and at the hour of our death

Amen.

The Rio Grande today.

The Rio Grande today is mostly used as a source of drinking water. Sadly, much of the water has been drained from the river, and it is almost dry. This is because people use more water from the river than the river can get back from rain and other sources. Experts are working to collect this through, with hopes of restoring the river to this past strength.

Today the river is important as a source of water for Texas and Mexicans. More important it is

- 1) Why is the Rio Grande so important?
B. It is the border of Texas and Mexico
- 2) The author most likely writes that "downward"
C. highlight the fact that the Rio Grande flows
- 3) The word furious most nearly means.
A. Angry
- 4) The Rio Grande has endpoints in.
D) Colorado and the Gulf of Mexico

The Rio Grande.

Although not the longest river in America, the Rio Grande is one of the most important. But, unlike other significant rivers it is not used for shipping. In fact, oceangoing ships cannot navigate the waters. No what makes the Rio Grande so important is its location. Since 1848, it has been the official border of Texas and Mexico.

Rio Grande geography.

The Rio Grande is either the fourth or fifth longest river system in North America. It all depends on how it is measured. Because the river twists so much, it occasionally changes course. And these course shifts can cause it to be longer or shorter. At its last official measure, the Rio Grande clocked in at 1,896 miles. The river starts in Colorado and extends downward to the Gulf of Mexico.

Downward is the best way of describing it too. Not only does the river extend south, but it also starts in the mountains and get lower, and lower in elevation as it extends to the Gulf.

Its name is Spanish for the "Big river" but the Rio Grande is actually known as Rio Bravo in Mexico, "Bravo" translates as furious so the name makes sense. Because it is twisty and turns, it certainly does seem to be angrier than most rivers.
