

Examen 3P

1. Procedimiento

$$R: - / \quad 30.000.000 \times \left(\frac{5}{15}\right) = 10.000.000$$

$$5 + 4 + 3 + 2 + 1 = 15 \quad \checkmark$$

$$2. R: - / \quad 30.000.000 \times \left(\frac{3}{6}\right) = 15.000.000$$

$$3 + 2 + 1 = 6$$

$$3. R: - / \quad 30.000.000 \div 12 = 2.500.000$$

$$2.500.000 \times 2,45\% = 61.250 \times 12 \text{ meses} = 735.000$$

$$30.000.000 + 735.000 = 30.735.000$$

$$4. R: - / \quad \begin{array}{l} 100 \text{ representantes} = 400\% \\ 2 \text{ Representantes indigenas} \end{array}$$

$$6. R: - / \quad \begin{array}{l} 200\% = 750.000 \times 30\% = 225.000 \\ 2010 = 975.000 \end{array}$$

$$5. R: - / \quad \begin{array}{l} 1 \text{ Representante} = 250.000 \\ 2 \text{ Representantes} = 500.000 \\ 4 \text{ Representantes} = 1.000.000 \end{array}$$
