Vocabulary

Happily: Felizmente.

River: Río.

Chair: Silla.

House: Casa.

Eleven: Once.

Water: Agua.

Beautiful: Bonita - Bonito.

Supermarket: Supermercado.

The incredible Machine:

Everyone has a favorite attraction at an amusement park, and I am no different. However, unlike most people who seem to prefer rollercoasters, my favorite ride is a little more gentle. Every time I go to Coney Island, Navy Pier, or the Santa Monica Pier, I absolutely have to ride the Ferris wheels.

The ferris wheel is simple and yet also quite complex. That is, riding it is easy, but how it works is complicated. A series of carts are attached to a wheel, which is attached to a rim. That rim rotates vertically around an axis, and gravity keeps the carts upright. As simple as the ride

Seems, only advanced engineers can make safe and fun Ferris wheels.

What it lacks in thrills:

While the Ferris wheel is not as thrilling as a rollercoaster, it is still very exciting. The fact of being high in the air makes it so much more entertaining than a lot of rides. I mean, how often do you hang from that high up in daily life?.. Nevertheless, I have to admit, I don't seek Ferris wheels out because of their excitement. Rather, I find them very relaxing. At the top of the Ferris wheel, you get beautiful sights of the park. You also get a sense of calm that you don't get in the hustle and bustle of the park below.

Additionally, Ferris wheels are also gorgeous to look at when they are lit up at night. In fact, the original Ferris wheel was designed as much to be seen as to be ridden.

It happened at the world's fair:

The first Ferris wheel was made by and named after George Washington Gale Ferris, Jr. He designed it for the Chicago World's Fair in 1893. It was the tallest attraction there, standing 264 feet high. In 1893, anything that was not turned by hand was considered a sight to see. And the wheel, which was a machine, was truly incredible to see. Further, as one visitor put it, the wheel was amazing because it seemed to be missing support. That is, it did not look like it could stand on its own. And yet it did and even rotated.

They keep reaching higher and higher:

Ferris wheel technology has only improved since then. Most of today's Ferris wheels are much larger than that first one. The largest in the world is the "Singapore Flyer" which stands slightly taller than twice what Ferris's did! Today, the Ferris wheel is the most common amusement park ride. But should take them for granted. Instead, be thankful for Ferris invention. The next time you're at an amusement park, don't just look up at the impressive wheel in the sky on your way to a newer attraction. Take it for a spin!

Vocabulary:

- Attraction: Atracción.
- People: Gente - Personas.
- Rollercoaster: Montaña rusa.
- Island: Isla.
- Santa Monica Pier: Puerto de Santa Monica.
- Ferris wheels: Ruedas de la fortuna.
- Complicated: Complicado.
- Around: Alrededor.
- Gravity: Gravedad.
