Coffee is popular around the world. In the  
past centuries, few scientists have been  
or carefully studied as coffee is now.

Coffee has been well known during the  
beginning of the 14th century when  
Yemenis started using coffee to stay  
awake during special activities. It became  
a popular medicine about Europeans in  
the 1600s.

Coffee was first described in the 1800  
by Francesco Saverio Marzani, a doctor that found  
out some effects that coffee had on  
people. He believed coffee is good. Studies show  
it is good for your heart.

## James Carter Days in Film

James Carter was a pilot in the United States Air Force. After the end of the military profession in 1953, Carter published his first novel, *The Hunters*. He is best known as a novelist, but during the 1960s and 1970s, he worked in film making. Carter made documentaries, wrote text for films, and also was the director of a film called *Three*, starring Charlotte Rampling and Sam Waterston.

In 1980, Carter published *Passionate*, which was adapted from Carter back during the 1970s. Published in the 1970s, the author Carter tells the story of his life in film.

Carter's time in the film world is both good and bad. In some, he met directors and actors. In Hollywood, he explored the city with Robert De Niro and shared Ben Stiller's Deborah Trachtenberg and Michael Caine. Carter never talked about Carter's first director. In the last book, Carter said that his first director was film director.

Of course, Carter's time in the film world was not all good. There was money, attractive women, and a lot of people who were always there for the dinner table for the "big" party. Carter thought he was wasting his time.

Perhaps he wasted his time in a large artistic world. It still makes for attractive reading.
