It happened at the water tower

The first Ferris wheel was made by and named after George Washington Gale Ferris designed it for the Chicago World's Fair in 1893. It was the tallest attraction there, standing 214 feet high. In 1893, something that had not turned by hand was considered a sight to see. And the wheel, which was machine was truly incredible to see. The visitor put in the wheel was amazing because it seemed to be missing support. The iron did not look like it could support on is. It did not look like it could support it did and even rotated.

They keep reaching higher and higher

Ferris wheel technology was only improved then much later than that. The largest in the world is the Singapore Flyer with 165m slightly taller than the one in London. The most common amusement park ride but that does not mean you should take them for granted. Instead be thankful for Ferris wheel the next time you're out at an amusement park. Don't just look up at the impressive wheel in the sky or your way to a newer attraction take or for a spin.

Solution

The present perfect of any verb is made up of two elements: the appropriate form of the verb to have in the present and the past participle of the main verb. The past participle form of a regular verb is root + ed e.g. played, arrived, looked.

Regarding irregular verbs see the table of irregular verbs in the verbs section

## Our father

Our father, who art in heaven,  
Hallowed be thy name. |

Thy kingdom come.

Thy will be done, on earth as  
it is in heaven.

Give us this day our daily  
bread. And forgive us our  
trespasses, as we forgive those  
who trespass against us.

And lead us not into  
temptation, but deliver us  
from evil. Amen.

## the incredible machine

Everyone has a favorite attraction at an amusement park and I am no different. <sup>However</sup> unlike the most people who seem to prefer roller coasters my favorite ride is a little more quiet. Every time I go to Coney Island, I buy one of the same monkey pit. I absolutely love to ride the ferris wheel.

The ferris wheel is simple and yet also quite complex. That is riding it is easy but how it works is complicated. A series of cars are attached to a wheel, which is attached to a arm that can rotate vertically around an axis and gravity keeps the cars upright. As simple as the ride seems, only dedicated engineers can make safe and fun ferris wheels.

### what it looks like

While the ferris wheel is not as thrilling as a roller coaster, it is still very exciting. The fact of being high in the air makes it so much more entertaining than a lot of rides. <sup>mean</sup> How often do you hang from that high up in daily life?

Nevertheless, I have to admit, I don't seek ferris wheels out because of their excitement rather, I find them very relaxing. At the top the ferris wheel you get beautiful sights of the park. You also get a sense of calm that you don't get in the hustle and bustle at the park below.

Additionally, ferris wheels are also gorgeous to look at when they are lit up at night. In fact, the original ferris wheel was designed
