Materials

A material is what something is made of. There are 5 basic materials. Most things are made of these 5 materials. Some things are made of metal. Some things are made of glass. Some things are made of wood. Some things are made of cloth. But they are not used as much as these 5 materials.

Let's talk about metal first. Metal is very heavy. And it is very hard and strong. It usually feels cool if you touch it. We use metal to make lots of things. We use it for forks and knives. We use it for keys. We use it for cans. We use it for these things because it is very strong.

Next, let's talk about glass. Glass is very smooth. It feels cool to touch. It is not as heavy as metal. It is hard. But it is not strong. It breaks very easily. Then why do we use it? We use it because it is clear. You can see through glass. That's why we use it for windows. That's also why we use it for glasses.

Now let's talk about wood. Wood is lighter than metal and glass. It is not as strong as metal. But it is much stronger than glass. We use wood to make lots of things. Things made from wood are usually light and hard and strong. Chairs and tables are made from wood. Pots are made from wood.

Now let's talk about cloth. Cloth is ver light. It is much lighter than wood. And it is ver soft. We use cloth to make lots of thing. for example it used to make clothing. And it use to make blankets.

Last let's talk about plastic. Plastic is also very light. But it is different from cloth. Sometimes it is soft. And something it is hard. Plastic can be used to make thin plastic bags. The are light, soft, and strong.
