The Grand Canyon

The Grand Canyon, one of the Seven Wonders of the Natural World, is located in the state of Arizona. It is also a UNESCO World Heritage Site. Formed by over 70 million years of erosion from the Colorado River, the Grand Canyon offers a spectacular view. The canyon spans 277 miles in length, up to 18 miles in width, and it measures over a mile in depth at its deepest points. Carlos always wanted to visit the Grand Canyon, and recently he received the chance to hike some of the trails and take several panoramic photographs during his visit.

When Carlos arrived at the visitor center, he watched a brief movie that taught tourists about the geological history of the canyon's formation. Carlos followed a hiking trail to become even further acquainted with the canyon. While on the trails, Carlos saw some tourists riding donkeys to traverse the canyon's ridges. For his hiking expedition, Carlos used a map to find some of the best hot spots for photographing the canyon. He revisited some areas at different points in the day because sun angles can make a big difference in the quality of a photo.

Carlos was very pleased that he got to travel to the Grand Canyon. He loves hiking, so this was the perfect outdoor experience for him. He posted all of his best pictures, and his friends were amazed by his breathtaking, panoramic shots.

- All of the following is true about the Grand Canyon except:
 - It is a UNESCO World Heritage Site.
 - It is one of the Seven Wonders of the Natural World.
 - It is a U.S. National Park.
 - Its measurements are unknown.
- What geological process best explains how the Grand Canyon formed?
 - A volcanic eruption
 - River erosion
 - A tsunami
 - An earthquake

What did Carlos do first during his trip?

- Watch a short film at the visitor center.
- Hike the trails of the Grand Canyon.
- Find different spots to take photographs.
- Get on a donkey tour along the ridges.
