OUR FATHER

Our Father, Who art in heaven
hallowed be Thy name
thy will be done,
on earth as it is in heaven

Give us this day our daily bread
and forgive those who trespass,
as we forgive those who trespass against us
and lead us not into temptation
but deliver us from evil amen

Hail Mary

man Holy
full of grace
the lord is with the
blessed art thou among women,
and blessed is the fruit
of thy womb Jesus

holy Mary

mother of god

pray for us us sinners now

and the hour of our death

Amen

Activity

It is a machine. But it is not just any machine. It is a machine that moves. It follows instructions from a computer. Because it is a machine, it does not get tired. And it does not make mistakes. Unless you tell it to!

Robots are all around us. Some robots are used to make things. For example, robots can help make cars. Some robots are used to explore dangerous places. For example, robots can help explore volcanoes. Some robots are used to clean things. These robots can help vacuum your house. Some robots can even recognize words. They can be used to help answer telephone calls. Some robots look like humans. But most robots do not. Most robots just look like machines.

Long ago, people imagined robots. Over 2,000 years ago, a famous poet imagined robots. The poet's name was Homer. His robots were made of gold. They cleaned things and they made things. But they were not real. They were imaginary. Nobody was able to make a real robot. The first real robot was made in 1961. It was called Unimate. It was used to help make cars. It looked like a giant arm.

In the future, we will have even more robots. They will do things that we can't do. Or they will do things that we don't want to do. Or they will do things that are too dangerous for us. Robots will help us fight fires. They will help us fight wars. They will help us fight sickness. They will help us discover things. They will help make life better.

Vocabulary

- follows
- Mistakes
- robot can help
- place
- Cion things

- 1) Beta: Robots need help
