She's knowing Alfie very well.

4. Are you going to Chinese classes?

Are you going to Chinese classes?

5. What are you thinking about the film?

What are you thinking about the film?

### READING COMPREHENSION

Are organic foods really more nutritious than non-organic foods? Read about this issue in the reading below and answer the questions.

#### ORGANIC FOODS

Organic food is very popular these days. It can also be very expensive. Some organic food costs twice as much as non-organic food. Parents of young children, and even some pet owners, will pay high prices for organic food if they think it's healthier. But many others think organic food is just a waste of money.

There is one main difference between organic and non-organic food. Organic farms do not use agricultural chemicals such as pesticides that stop insects from damaging crops. In many countries foods that claim to be organic must have special labels that guarantee they're grown organically.

Some people think organic also means "locally grown", and originally this was true. But over time organic farming has become big business, with many organic foods now being grown by large agricultural companies that sell their products far from where they're grown. Processed food made with organic ingredients has also become more popular.
