15 tomato	coconut	oat meal	Champagne	salam

según de lo que entendí del texto,
hay diferentes grupo de comida,
(los cuales son) f.) estos contiene
nutrientes y diferentes beneficios y
estos son buenas para la salud.

why are the groups presented in
pyramid? what does it mean?

it is represented in this way since
from the bottom are the healthiest
foods while the highest are the
most harmful.

it is a graphical reference of
the amount of the different food
groups that we must consume daily
to stay healthy.

carbohydrates will help you improve your performance, as they will increase your endurance and accelerate the recovery of your muscles. Carbohydrates are as important as vitamins, proteins, minerals and fats.

It is important not to eat junk food because it expands the possibilities of developing diseases due to poor nutrition. It facilitates overweight and obesity, with all its consequences, it raises bad cholesterol and increases the risks of cardiovascular problems.
